Why on earth would you EVER want to stop XM Radio's Instant Traffic and weather? this is the way free commerce should work. Finally, somebody finally offered me the service I really need, instant traffic and weather, all the time. Not only is it a FANTASTIC service, but no other station in my area even comes close to offering a service this good.

And now you want to stop it? What madness is this? Local radio might give a couple of traffic reports every hour, and ten only during certain hours a day. Except when there's a baseball game, then I get no traffic at all.

Don't let the big money lobbyists sway you. Leave XM Radio alone. Please, reject the National Association of Broadcasters petition 04-160.
